Procurement Heat	crandon 20. 59-1	
Corporation is a recorder referred consequented CB-limot commercially betteries in our discharge characteries characteries are consequented as a consequente characteries of the consequente characteries of the consequente characteries of the consequente characteries of the consequence c	contract No. 602, Tank Order 1, the lesigning and building a special me do in the contract as Recorder 12. The battery to be used with the semilable. The contractor requirer to test the recorder performance requisition of the battery. requested that arrangements be under the BB-102/U Stock No. 6110-806-025 ttle Potessium Hydroxide Stock No.	gnetic tape to 1 and to equipment is the one of these to deliver as items:
Ship to:		
the above liste terms of steril be exceeded with	griganut will be used on a Sterile A items should be handled in secondity Code 1. It should be noted the h use. Due to the short time sche that delivery be made by 30 August	hence with the st both items will hale for this project,
